LIGHT UP EMOTIONS

Feeling, is what converts time into moments, into snap shot of time to remember.
Emotions convert space into a home, yours.

At Simon, we know that the spaces are the center of all these experience and be
able to fill them with nuances and different intensity of sensual.
So you not only living them, but you resonating
with them.

Touch, see, hear, feel.

We want to offer you a whole range of sensations.

Simon | E6

ENDLESS FREEDOM

THE PLACE
UNDER THIS CHAOTIC WORLD
LIKE A PARADISE, LIKE THE PEACE OF MIND
THIS PLACE, WE CALL IT
FREEDOM.

GIVING SOFT AND GENTLE LIGHT

86mm INTEGRATED

ELEGANT AND MAGANIFICENT
SAY NO TO IRREGULARITY
ENSURE THE VISUAL COMFORT
(APPLICABLE TO STANDARD 86 BOTTOM BOX)

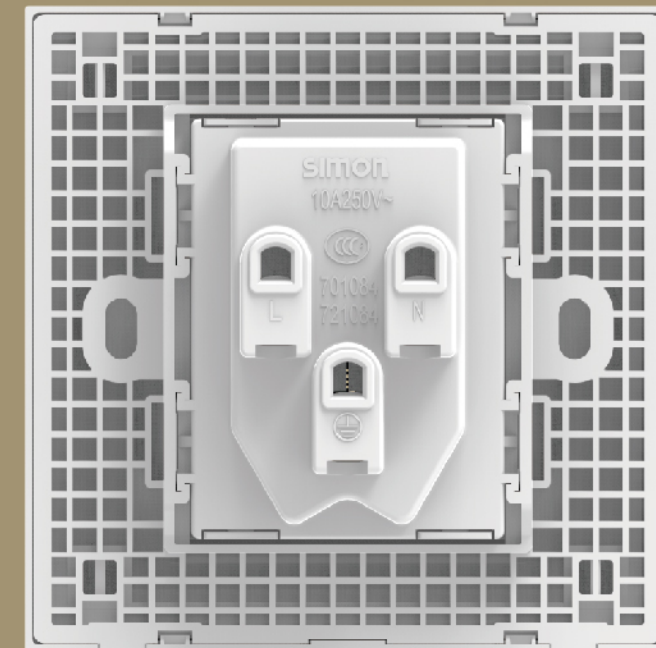

Spraying process

- Through 12 steps spraying process. Abrasion performance is improved with UV-curing.
- Using consistent, environmental paint and UV coating. Healthy and no pollution.
- Using matt spraying treatment, providing better touch and superior feeling.

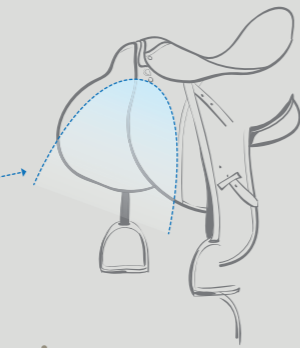

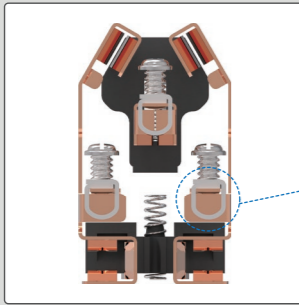

Ingenious & steady

Reinforced structure

Using the structure of high density grillage beam stiffener, showing intersecting parallels, and the overall stress strength is improved.

The solid materials provide sustainability, stability and layering, making the products

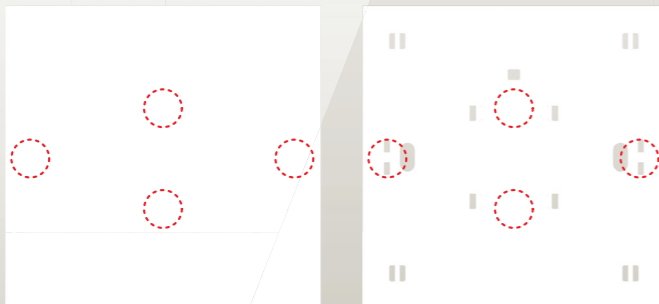

Saddle connection

Saddle connection is a new mode of physical connection. Different from traditional point compression, it adopts surface compression, which has stronger applicability, and brings no harm to wires.

Tips:

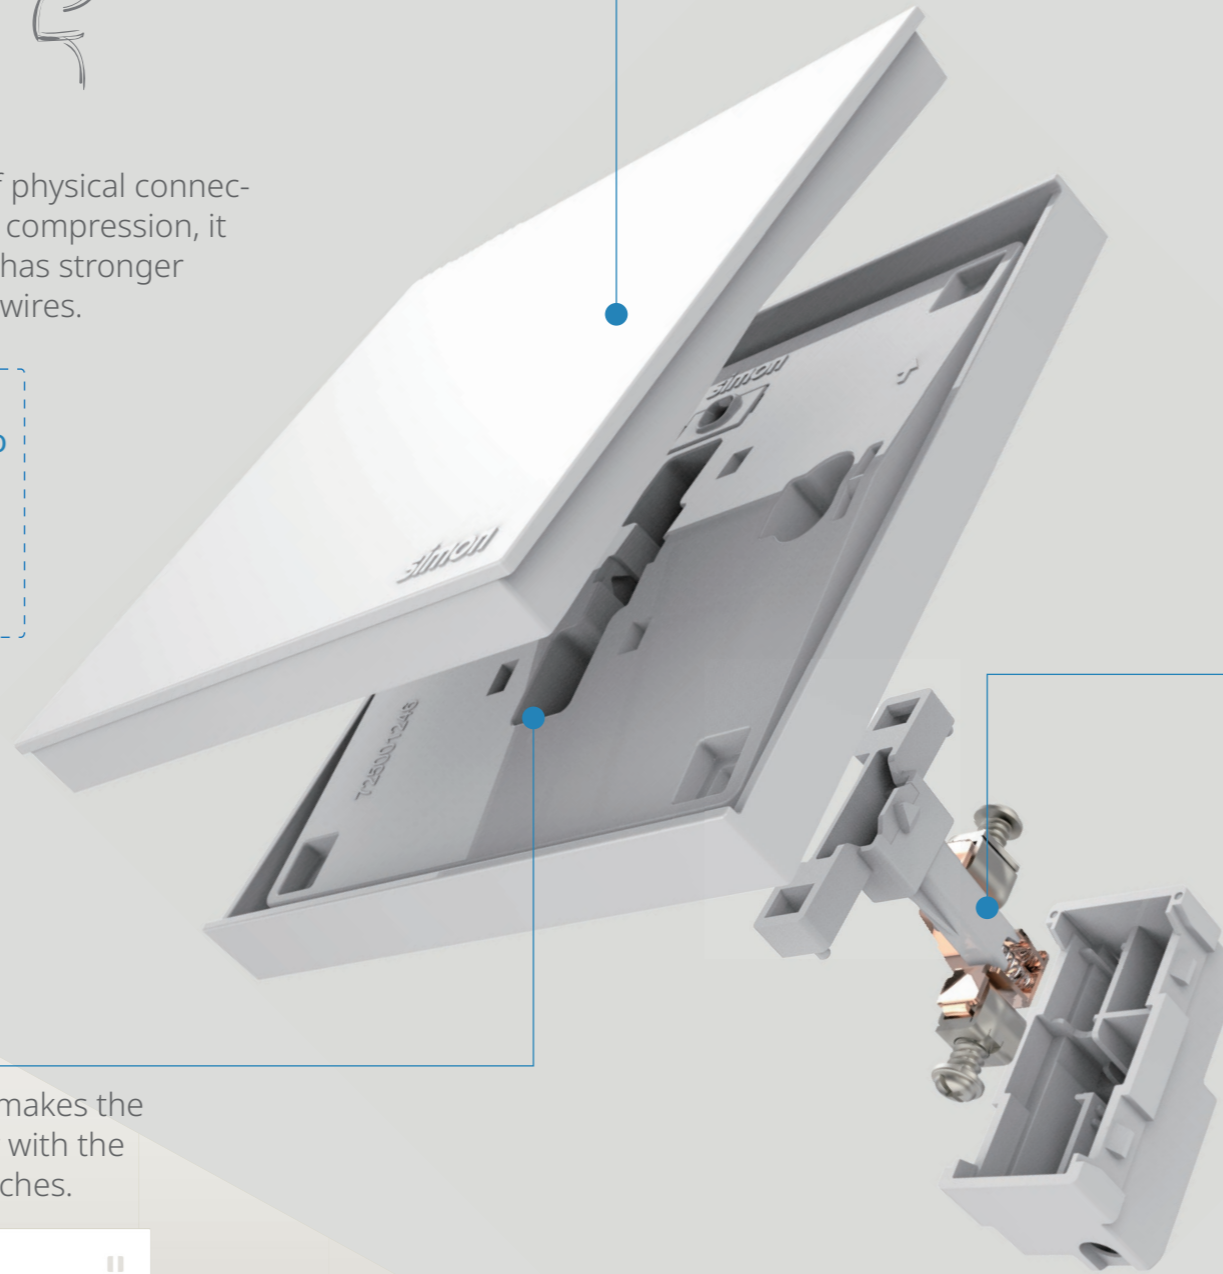

Saddle connection can connect to $\text{Ø}0.5\text{mm}$ cables in minimum, and connect to one 4mm^2 plus one 6mm^2 cables at one time in maximum. It's adaptable to both soft

The design of four points fastener makes the rocker switch connect more closely with the baseboard and provides firmer touches.

High quality PC for entire product

- No deformation under the heat proof test $\leq 125^\circ\text{C}$.
- It passed 850°C fire test with really fast fire extinguish time, which is less than 15s.
- Safe and reliable.

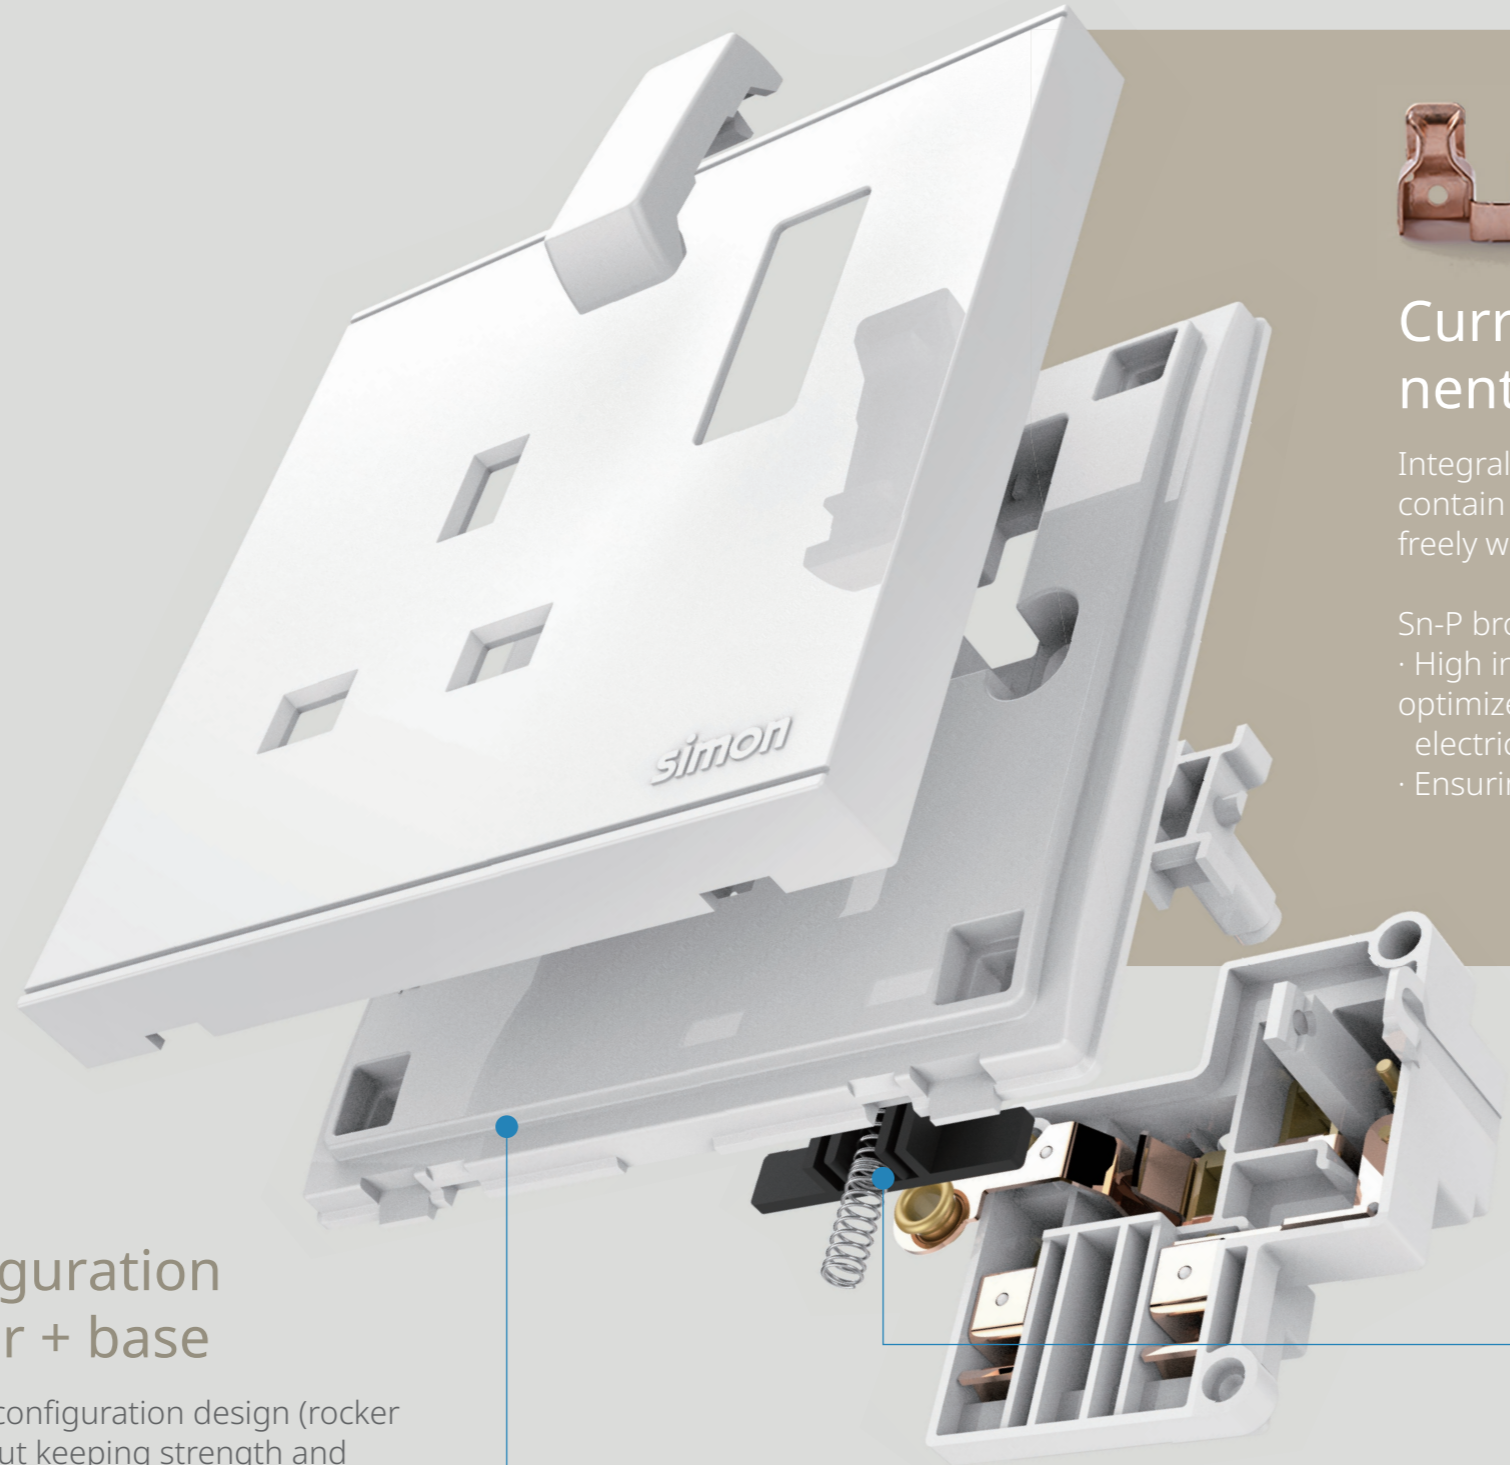

J-type toggle mecha-

Fast breaking
Higher breaking speed for reduce electric arc efficiently, which is much safer to use.

Switch contactors
Silver alloy contactor has a bigger size contact point, which has a higher security.

Ultra-strong load
16A ultra-strong current carrying capacity.

Twinset configuration design (rocker + base)

Abandoning traditional configuration design (rocker + frame + base plate), but keeping strength and facilitate installation.

Current-carrying components

Integral formed Sn-P bronze current-carrying parts do not contain rivet or welding connections. Electric current can flow freely without blocks.

Sn-P bronze material quality:

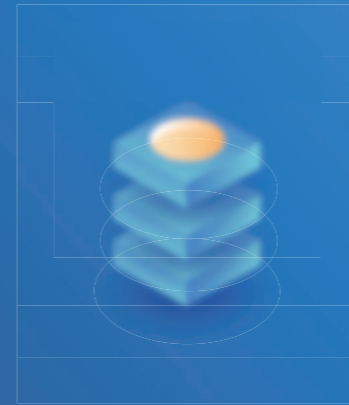

- High intensity, long-range elasticity, anti-fatigue function, and optimized electrical conductivity.
- Ensuring the good contact and durability for all types of plugs.

The design of shutter can effectively prevent children from inserting conductive objects into sockets.
